

INNOVATIONS FROM THE INDUSTRY

Technology Updates and Automation Expertise from SEW-EURODRIVE

SEW-EURODRIVE — Much More Than Gearmotors

Our team of (MAXOLUTIONS) automation engineers provides the expertise, project planning, software, commissioning, and worldwide support for your most challenging motion control projects. They can serve as a valuable extension of your engineering team, reducing the stress and demanding workload.

Our experts provide a solution of perfectly matched SEW components that work together seamlessly — because we designed them that way!

Complete Drive Maintenance and Management

SEW-EURODRIVE now offers a full complement of drive maintenance and management services. Our CDM® Maintenance Management service provides a 24/7 online portal as well as a complete overview of your drive components, the condition of your units, drive usage, and service details. Plus, our new on-site Pick-Up Box Service will free up your maintenance team for other tasks. Just place your drives that need repair in the supplied box and we'll handle the pick-up and return of your units.

MOVIGEAR® and MOVI-C® for Decentralized Installations

MOVIGEAR is the mechatronic drive system that combines the gear unit, IE4 motor, and electronics in one compact unit. Recent updates include fully integrated Ethernet/IP communications and digital motor integration. This advanced single-cable technology carries power, feedback information, and control signals along a single hybrid cable between decentralized devices. MOVI-C modular automation system is a one-software, one-hardware, automation platform that combines fully integrated components, control electronics and software.

About SEW-EURODRIVE

Engineering excellence and customer responsiveness distinguish SEW-EURODRIVE, a leading manufacturer of integrated power transmission and motion control systems. SEW-EURODRIVE sets the global standard for high performance and rugged reliability in the toughest operating conditions. With global headquarters in Germany, its U.S. operations include a state-of-the-art manufacturing center, five regional assembly plants, more than 63 technical sales offices and hundreds of distributors and support specialists. This enables SEW-EURODRIVE to provide local manufacturing, service and support, coast-to-coast and around the world.
