Lubriplate Will Then Create Customized Color Coded Lubrication Charts Specifically For Your Plant.

- Color coded charts provide quick and easy identification of the correct lubricant for each application.
- Charts are custom made. Lubricants and applications match up to specific machinery and equipment in your plant.
- Quickly identifies NSF H1 food grade lubricants which increases safety and simplifies food safety audits in food processing plants.
- Charts are available in a variety of sizes - Standard sizes are 24" x 36" (poster size), printed on PVC board, or 12" x 18" mounted on foam board or plastic laminated, or smaller 11" x 14" or 8 1/2" x 11" plastic laminated.
- QR codes provide links to important product and safety information.

3

Lubriplate Will Also Provide Color Coded Lubricant Storage Tags and Signs.

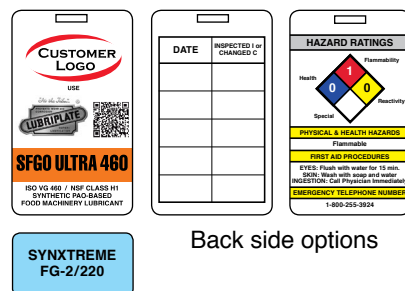

- Organizes your oil storage room.
- Allows quick identification of the correct lubricant needed, saving time and money.
- Colors and/or shapes are used to identify each lubricant.
- Lubricant storage tags can be printed on PVC plastic or magnetic material for ease of application on steel storage containers.
- QR codes provide links to important product and safety information.

4

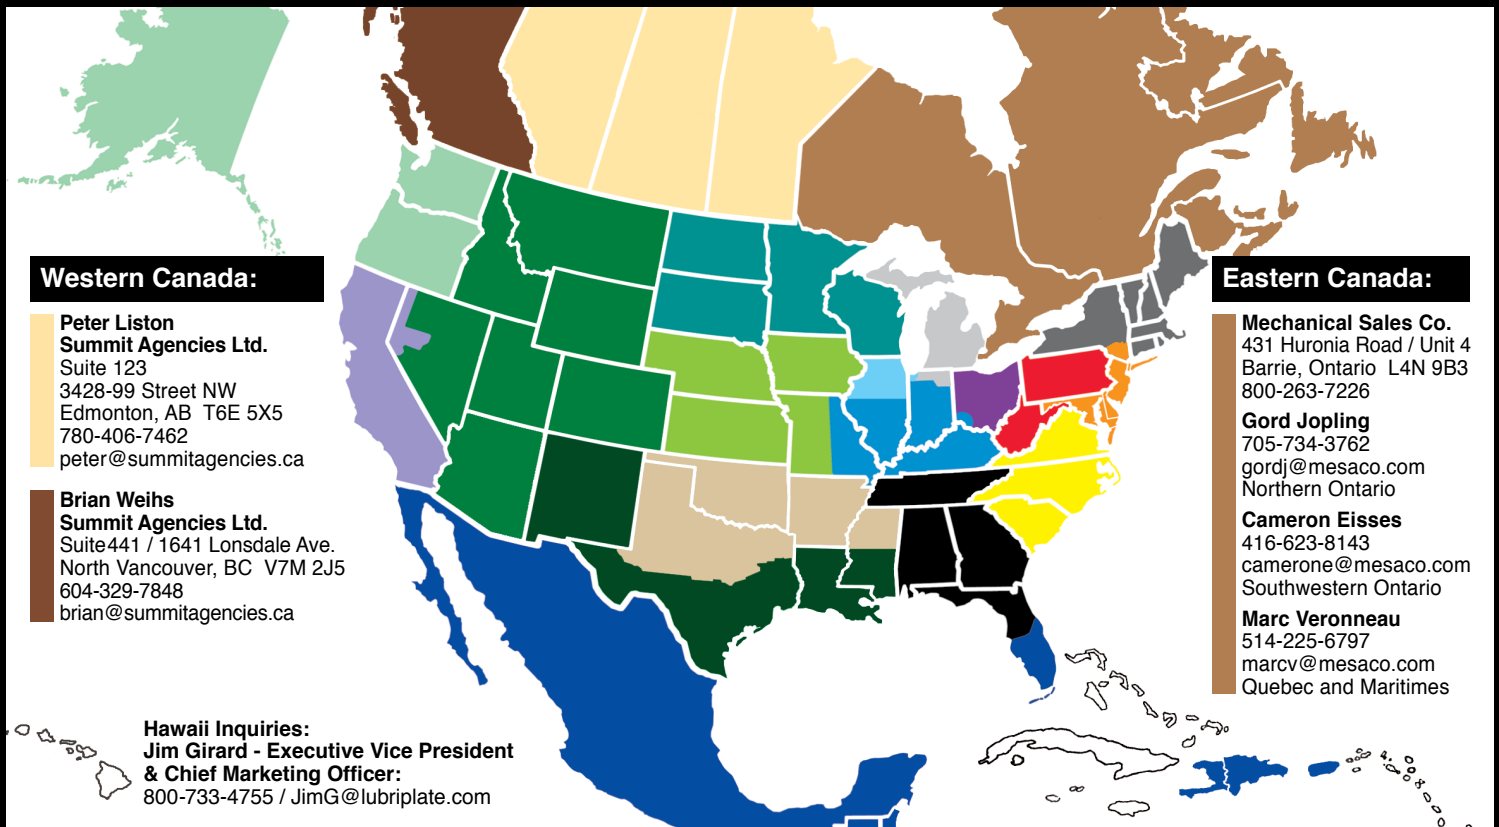

Color Coded Tags Will Be Provided For Individual Machine Components Throughout Your Plant.

- Quickly identifies the correct lubricant for each piece of equipment in your plant.
- Machinery tags match the application chart(s) and lubricant storage tags.
- Standard sizes are 3 3/8" x 2 1/8" or Small 2 1/8" x 1 1/8"
- Tags can be customized with your logo.
- QR codes provide links to important product and safety information.
