OVERVIEW**

Movex[®]

Movex®

Global Thinking, Local Acting.

Your business is stepping into the future.

The rich experience that **Movex** has acquired over the years shows that care and innovation of products are essential to guarantee constant quality.

Thanks to the investments as well as developing strategic departments **Movex** has created new space where research and innovation become concrete tools to satisfy customers' requirements.

A top service level is the goal of a qualified Engineering and Sales team with the objective of presenting **Movex** as a supplier of excellence to all clients.

Through a distribution/network which spans the globe, **Movex** offers technical support and a careful after-sales service, always at your disposal.

PFX - MOVEX'S NEW PLASTIC COMPOUND

Energy saving

Food contact certified

High visibility and efficiency

Low friction

PFX is a plastic compound developed specific for chain and belts in order to run with limited lubrication or in dry applications where the demands are extreme concerning speed, performance & efficiency.

PFX is developed to reduce the friction between chain and product as well as chain and wearstrips even if no lubrication is used.

Also developed to avoid dusting under these extreme circumstances. The consistent quality of this material assures a continuous low friction with a high strength resulting in longer wear-life.

The value added properties of the new **PFX** material, contribute to a better control of total cost and sustainable conveyor technology.

Description

Extra Performance material (PBT with additives)

Very low coefficient of friction and improved wear resistance. Recommended for high speed and dry running applications.

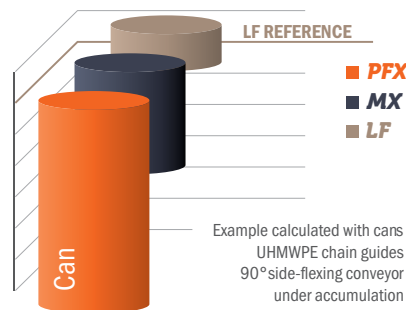

Colour: Fluorescent Orange

Primary Components: PBT

PFX Products available in **PFX**

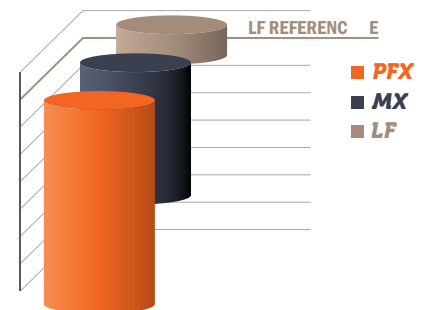

Power saving

RELATIVE TO LF = 100%

PV

MAGNETIC CORNER TRACKS

Movex Curves are designed to offer better conveyor performance. Suitable for steel and plastic chains, our curves are produced with computer controlled machines with a smooth chain guide surface.

Available in different materials and designs:

- **UHMW-PE** (standard applications)
- **BluLub** (limited or no lubrications)
- **RS** (high performance)
- and the new **RS PRO** (Super Magnetic RS Curve)

RS PRO
SUPER RS
MAGNETIC CURVE

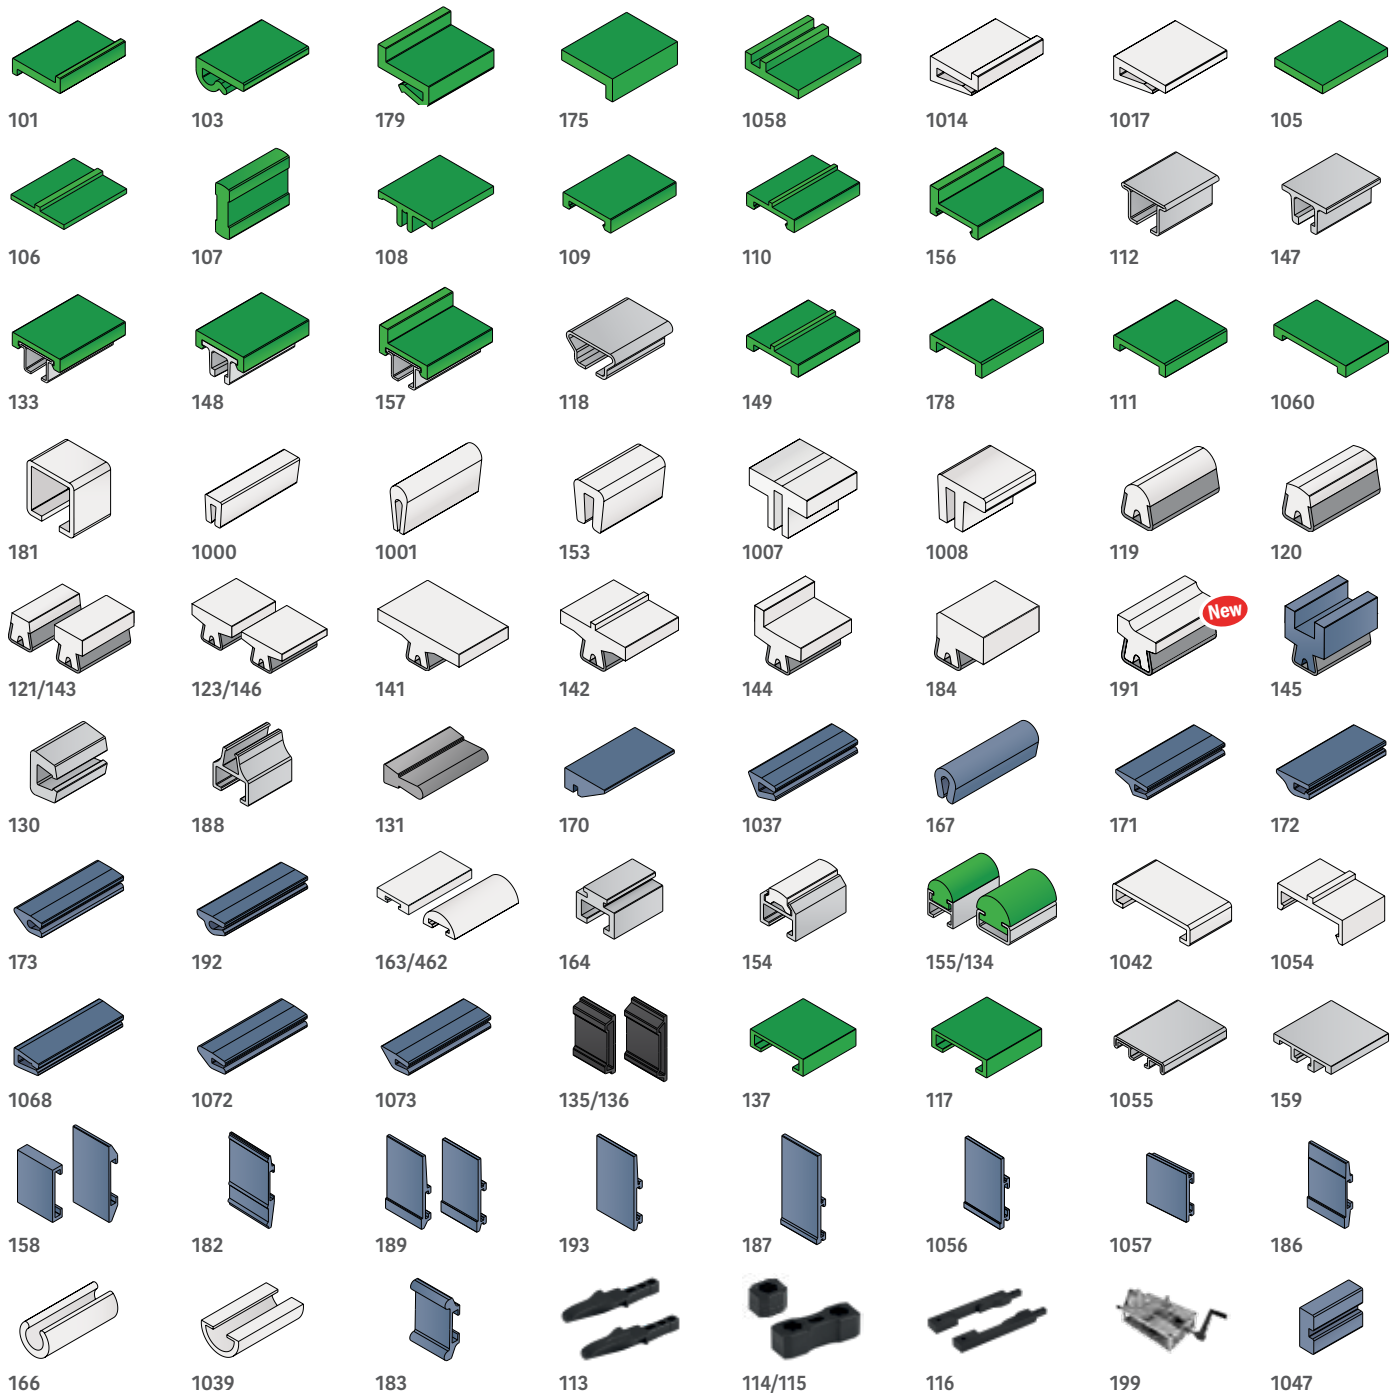

RS PRO is a patented system with a special return section-plate providing a total support of the chain or belt in the return of the curve.

RS PRO can be used for chains as well as chain-belts. Depending on the installation of the return-section plate, the correct space is created in the return.

RS PRO means longer wearlife of chain and curve, lower maintenance cost and better performance!

Suitable for Chain-belts & Plastic chains: 260 M & 880 M

EXTRUDE PROFILES UHMW-PE & BluLub®
